## **DETAILED ACTION**

### ***Response to Remarks.***

1. The Office Action has been issued in response to amendment filed February 1, 2008. Claims 1-7, 10-18 and 26 are pending.

### ***Allowance***

2. The following is an examiner's statement of reasons for allowance: The most pertinent prior art is Reed (EP 0743616 A2) and Dietrich et al (US Patent No.: 7,201,340). Reed discloses a method for counting sheets which method comprises the steps of providing a bundle of banknotes, which bundle comprises at least one surface defined by the edges of banknotes illuminating the surface of said bundle providing a two-dimensional image of the bundle by making use of an optical sensor and providing an output signal that represents the result of the analysis. However, Reed does not expressly disclose bundle of banknotes and subjecting the bundle to one or more destructive operation. Dietrich discloses a method for processing sheet material which includes bundle of banknotes and subjecting the bundle to one or more destructive operation. However, neither Reed or Dietrich disclose wherein one or more sides or edges of the bundle of banknotes is subjected to a mechanical operation, such that one or more clean surfaces are obtained which clean surfaces are used in analyzing the bundle of banknotes. By analyzing the clean surfaces a determination can be made as to whether the banknote should remain in or taken out of circulation. The examiner

finds no reason or motivation to combine the above references in an obvious rejection thus placing the application in condition for allowance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made part of the record and not relied upon is considered pertinent to applicant's disclosure.

Weaver et al (US Patent No.: 6,351,552) is cited to teach a predestruction note image auditing system.

Lundblad (US Patent No.: 6,874,611) is cited to teach a teller machine for the infeed and outfeed of banknotes

Leuthold et al (US Patent No.: 4,878,626) is cited to teach an apparatus for destroying banknotes.
